

FIAT CHRYSLER AUTOMOBILES

February 27, 2019

Jeff Wildman
BASF Corp. Automotive Refinish
26701 Telegraph Road
Southfield, MI 48034

Dear Mr. Wildman,

BASF has fully complied with the FCA aftermarket refinish specification PF-10537, and has our full approval of both the solventborne and waterborne R-M[®] and Glasurit[®] brand products to be used for Chrysler, Dodge, Jeep, and Ram vehicle refinishing worldwide.

The refinish paint approvals are the result of a series of rigorous and comprehensive technical evaluations designed to ensure that a vehicle will be returned to pre-accident condition.

Only products meeting the FCA specifications should be used for warranty paint repairs or other refinishing.

Sincerely,

A handwritten signature in black ink that reads 'Dan Black'.
