Re:

Dear Mr. Wildman,

The following colors in the **Glasurit 90 Line** have completed our validation process and are approved for use in refinishing of all variants of the Lucid Air:

- Eureka Gold - L400
- Infinite Black – L901
- Quantum Grey – L205
- Cosmos Silver – L203
- Zenith Red – L304
- Stellar White – L102
- Fathom Blue – L806
- Sapphire Blue – L822

BASF refinish systems provide the ease of use, color match, and durability, ensuring that vehicles are refinished to pre-accident condition. Any further paint lines you may wish to be approved beyond the mentioned above, will need to go through the Lucid validation processes. This letter does not constitute any form exclusivity of your brand for use on our vehicles.

As a requirement from the Lucid Marketing Team, we do not allow any public announcements regarding the approval on social media, via brochures, or any other type of statement without Lucid's written permission. Please forward all proposed announcements to the following email addresses for approval:

Danielalmendarez@lucidmotors.com
Andymacdonald@lucidmotors.com

Sincerely,

Daniel Almendarez
Body Repair Paint Manager
